

As Chief Information Officer, Khalid Anjum is responsible for core IT decisions with respect to infrastructure, architecture, standards, application development, integration and data integrity for Middlesex County. Mr. Anjum applies his business and technical acumen to deliver tools and systems across the enterprise resulting in a highly productive, cost effective and innovative workforce.

As CIO, he recommends and implements policies established by the Board of Chosen Freeholders at the direction of the County Administrator in collaboration with other County executives as appropriate and deliver the necessary tools and systems to improve efficiency and reduce operating cost of County Government.

Mr. Anjum has won numerous technology awards for Middlesex County including the 2006 NJ Excellence in Technology Visionary award for his technical expertise, understanding of the business process, knowing which leverage points are needed to improve top and bottom line performance and developing strategic partnerships that are essential to success of Middlesex County.

Anjum has given technology focused speeches and presentations and has been the featured speaker before many information technology groups.

Mr. Anjum has been with Middlesex County since 1988.

Anjum earned a M.S. in Engineering from NJIT
